AMENDMENTS TO THE CLAIMS

The listing of claims below replaces all prior versions of claims in the application.

(Currently Amended): A soft vinyl chloride copolymer resin obtained by

copolymerizing (A) a vinyl chloride type monomer monomer comprising vinyl chloride,

vinylidene chloride or vinyl acetate and (B) a macromonomer having a polymer comprising an

ethylenically unsaturated monomer containing a double bond in a main chain, wherein the ratio

of (A)/(B) by weight is 50/50 to 80/20; and

wherein the macromonomer having a polymer comprising an ethylenically unsaturated

monomer containing a double bond in a main chain is prepared by living radical polymerization.

2-3. (Cancelled).

4. (Previously Presented): The soft vinyl chloride copolymer resin of claim 1, wherein at

least one of the macromonomers having a polymer comprising an ethylenically unsaturated

monomer containing a double bond in a main chain has a glass transition temperature of at most

0°C.

5. (Currently Amended): A process for preparing the soft vinyl chloride copolymer resin

of claim 1, which comprises polymerizing a vinyl chloride type monomer comprising vinyl

chloride, vinylidene chloride or vinyl acetate and a macromonomer having a polymer comprising

an ethylenically unsaturated monomer containing a double bond in a main chain by at least one

process selected from emulsion polymerization, suspension polymerization and microsuspension

polymerization.

6. (Previously Presented): A soft vinyl chloride resin composition comprising the soft

vinyl chloride copolymer resin of claim 1.
